

PRODUCT: DEHYDRATED LEEK (Allium ampeloprasum L. var. porrum)

Product description: Prepared from fresh, sound, thoroughly washed Egyptian leeks. Processed by controlled hot-air dehydration. Sorting and foreign-body controls (e.g. optical sorting, magnetic separation, metal detection) are applied according to the selected partner facility's procedures and the agreed customer specification.

Supply model: Produced at selected certified partner facilities in Egypt. Green Apple for Export and Import acts as supplier, exporter and supply-chain coordinator. Facility certificates and batch documents (e.g. COA) are provided per order, as applicable.

1. GENERAL INFORMATION & 2. ORGANOLEPTIC PROPERTIES

Botanical Name	Allium ampeloprasum L. var. porrum	Appearance	Green & white flakes / cut pieces
Country of Origin	Egypt	Odor	Fresh, characteristic mild onion-like
Ingredients	100% Leek	Taste	Mild, pleasant, characteristic leek
Additives / SO₂	No added additives; no SO ₂ added	Texture	Crisp, dry, free-flowing
Treatment	Non-irradiated; not treated with ethylene oxide (ETO)	Foreign Matter	Not detected on visual inspection; limits per agreed specification

3. CHEMICAL & PHYSICAL SPECIFICATIONS

PARAMETER	TARGET SPECIFICATION (LIMIT)	TEST METHOD
Moisture Content	≤ 7.0 %	ASTA 2.0 / ISO 939
Total Ash (on dry basis)	≤ 6.5 %	ASTA 3.0 / ISO 928
Acid Insoluble Ash	≤ 0.5 %	ASTA 4.0 / ISO 930
Sieve Analysis (Green/White Flakes)	5.0 mm – 10.0 mm (≥ 90 %)	U.S. Standard Sieve
Sieve Analysis (Cut / Granules)	1.0 mm – 3.0 mm (≥ 92 %)	U.S. Standard Sieve
Sieve Analysis (Powder)	100 % through 60–80 Mesh	U.S. Standard Sieve

4. MICROBIOLOGICAL CRITERIA (ALIGNED WITH ESA GUIDELINES)

PARAMETER	MAXIMUM LIMIT	REFERENCE METHOD
Total Plate Count (TPC)	≤ 100,000 CFU/g (≤ 10 ⁵ CFU/g)	ISO 4833-1
Yeasts & Molds	≤ 1,000 CFU/g (≤ 10 ³ CFU/g)	ISO 21527-2
Coliforms	≤ 1,000 CFU/g (≤ 10 ³ CFU/g)	ISO 4832
Escherichia coli	< 10 CFU/g	ISO 16649-2
Salmonella spp.	Absence in 25 g (or 125 g per contract)	ISO 6579-1
Bacillus cereus	≤ 1,000 CFU/g	ISO 7932

5. EU REGULATORY REFERENCES

- **Pesticide residues:** Supplied to meet the maximum residue levels (MRLs) of Regulation (EC) No 396/2005; residue testing per order or on request.
- **Ethylene oxide (ETO):** Product is not ETO-treated. ETO residues are assessed against the MRL set under Regulation (EC) No 396/2005; test reports available on request.
- **Contaminants / heavy metals:** Lead (Pb) and cadmium (Cd) to meet the maximum levels of Regulation (EU) 2023/915; batch results reported on the COA where requested.
- **Allergens & GMO:** The product does not contain ingredients listed in Annex II of Regulation (EU) No 1169/2011. Non-GMO raw material in the sense of Regulations (EC) No 1829/2003 and 1830/2003.
- Compliance for each shipment is confirmed by the batch documentation agreed in the contract.

6. PACKAGING, STORAGE & HANDLING

Primary Packaging	Double food-grade polyethylene (PE) liner bags, sealed as moisture barrier.
Secondary Packaging	Corrugated master cartons (10 kg / 15 kg net) or Kraft multi-wall bags / Big Bags, per order.
Labeling & Traceability	Product name, net/gross weight, batch/lot number, production & best-before date, storage guidelines.
Storage Conditions	Store cool and dry (< 20 °C, relative humidity < 60 %), off floor and walls.
Shelf Life	24 months from production date in unopened original packaging under the stated storage conditions.
