ABOUT GREEN APPLE

Your trusted Egyptian export partner

Green Apple Import & Export is an Egyptian export company specialising in the international supply of premium dehydrated vegetables under our Fresh Land brand. We connect global buyers with carefully selected Egyptian production partners, managing sourcing, production coordination, quality requirements, packaging and export logistics from Egypt to destinations worldwide.

Our core strengths

- Egyptian agricultural origin
- Consistent supply capabilities
- Export documentation support
- Flexible multi-facility sourcing
- Quality-focused production
- Worldwide shipping solutions

FOCUS

Origin • Quality • Supply • Logistics • Global export

THE FRESH LAND BRAND

Naturally sourced. Carefully dehydrated. Globally delivered.

Fresh Land is our product brand for dehydrated Egyptian vegetables supplied to international food manufacturers, distributors, importers and ingredient buyers. Our focus is simple: reliable products, consistent specifications and professional export service.

Dehydrated Onion

Flakes • Granules • Minced • Powder (red onion variants upon request)

Dehydrated Garlic

Flakes • Granules • Minced • Powder

Dehydrated Leek

Flakes • Granules • Powder

FRESH LAND — PRODUCT

Dehydrated Onion

Egyptian dehydrated onion supplied in multiple forms to meet different industrial and food-processing applications. Red onion variants are available upon request.

Available forms

Onion flakes

Naturally dehydrated onion pieces suitable for food preparations and seasoning applications.

Onion granules

Uniform dehydrated onion particles designed for convenient industrial use.

Onion minced

Perfect texture for meat processing and savoury snacks.

Onion powder

Finely processed dehydrated onion available in different mesh specifications.

APPLICATIONS

Food manufacturing • Seasonings • Sauces • Soups • Snacks • Meat products • Ready meals

FRESH LAND — PRODUCT

Dehydrated Garlic

Premium Egyptian dehydrated garlic supplied in practical forms for food manufacturers and industrial ingredient applications.

Available forms

Garlic flakes

Dried garlic pieces with natural aroma and flavour.

Garlic granules

Uniform granulated garlic for seasoning and industrial applications.

Garlic minced

Excellent for dressings and marinades.

Garlic powder

Finely ground dehydrated garlic in different mesh specifications on request.

Naturally sourced. Carefully dehydrated.

Specifications, mesh size and packaging format are agreed with each order.

APPLICATIONS

Seasonings • Sauces • Soups • Snacks • Meat products • Ready meals • Food manufacturing

FRESH LAND — PRODUCT

Dehydrated Leek

Egyptian dehydrated leek supplied for food manufacturing, seasoning and ingredient applications.

Available forms

Leek flakes

Dried leek pieces retaining the natural vegetable character.

Leek granules

Granulated leek for convenient industrial dosing.

Leek powder

Fine leek powder for seasoning blends and soup bases.

Product benefits

Convenient storage, extended shelf life, easy handling and a consistent ingredient format.

Naturally sourced. Carefully dehydrated.

Specifications, mesh size and packaging format are agreed with each order.

APPLICATIONS

Seasoning blends • Soups • Sauces • Ready meals • Food manufacturing • Culinary ingredients

SPECIFICATIONS & PACKAGING

Flexible specifications for industrial buyers

We supply dehydrated onion, garlic and leek according to agreed product specifications and customer requirements. Final mesh size, moisture, microbiological requirements and packaging format are confirmed with each order and agreed technical specification.

- Aluminium-lined packaging options
- Multi-wall kraft bags with food-grade inner liners
- Heavy-duty export cartons and high-barrier inner bags
- Customised packaging upon agreement

PACKAGING OBJECTIVE

Product protection • Hygiene • Handling efficiency • Export durability

OUR PRODUCTION NETWORK

Flexible production. Reliable supply.

Green Apple operates through a network of carefully selected production partners in Egypt. Rather than relying on a single facility, we work with suitable partner facilities according to product requirements, specifications, capacity and customer needs — greater flexibility with professional control over sourcing, production coordination and export execution.

01	Customer requirement
02	Production partner selection
03	Production & dehydration
04	Quality verification
05	Packaging
06	Export & shipment

KEY ADVANTAGE

Flexible sourcing capacity without compromising professional export management.

Quality is built into every shipment

Our quality approach starts with selecting suitable production partners and continues through product specifications, production coordination, packaging and export preparation.

Raw material selection

Careful sourcing of Egyptian agricultural raw materials.

Production requirements

Production is coordinated according to agreed product specifications.

Quality verification

Product quality and required documentation are reviewed before shipment.

Food safety

Production is carried out through selected facilities operating under applicable food-safety and quality systems.

Traceability

Orders can be managed through batch-related documentation and shipment records.

Certifications

Where applicable, certificates of the relevant certified production partner facility can be provided.

CERTIFICATION NOTE

Certificates belong to the certified production partner facility, not to Green Apple.

From Egyptian farms to your port

We coordinate the export journey from product sourcing through shipment preparation.

01	Agricultural origin	Egyptian agricultural raw materials are sourced according to agreed requirements.
02	Production	Selected production partners process and dehydrate the vegetables.
03	Batch management	Product batches are documented according to the applicable production and quality requirements.
04	Quality documentation	Relevant technical and quality documents are prepared for the shipment.
05	Packaging	Products are packed according to agreed export packaging specifications.
06	Container loading	Containers are inspected and prepared before loading.
07	Export	Documentation and shipping arrangements are coordinated for international delivery.
08	Destination	The shipment reaches the customer's nominated port.

Professional export & logistics management

Green Apple manages the export process from order preparation through container loading and international shipment.

FCL shipments

Flexible full-container-load supply according to customer requirements.

Container inspection

Containers are checked before loading to ensure they are clean, dry, odour-free and structurally suitable.

Professional loading

Cargo is arranged to maximise protection and loading efficiency.

Export documentation

We coordinate the required export documents for each shipment.

Typical documentation

- Commercial invoice
- Packing list
- Certificate of origin
- Certificate of analysis
- Phytosanitary certificate
- Ocean bill of lading

INCOTERMS

FOB • CFR • CIF

WHY PARTNER WITH GREEN APPLE

More than a supplier. Your Egyptian export partner.

01 Egyptian origin

Access to Egyptian agricultural products and established sourcing capabilities.

02 Multi-facility network

Flexible access to selected production partners according to product and order requirements.

03 Year-round supply planning

Supply planning designed to support long-term customer relationships.

04 Quality-focused coordination

Production and quality requirements are coordinated according to agreed specifications.

05 Export expertise

Professional handling of documentation, packaging and international shipping.

06 Long-term partnerships

We build reliable and sustainable relationships with international buyers.

From Egypt to markets worldwide

- Europe
- Middle East
- Africa
